TESS Project Candidates

The [TESS Project Candidates table](#) contains a list of TESS Objects of Interest (TOI), as identified by the TESS Project, consisting primarily of planetary candidates identified by TESS, but also containing previously known transiting planets and false positives detected by TESS.

The NASA Exoplanet Archive TOI list is built periodically from the TOI list available on the Exoplanet Follow-up Observing Program (ExoFOP) site, which is updated twice a day. The date of the last update for the TOI table at the Exoplanet Archive is given in the tab at the top of the table.

For the most up-to-date versions of the TOI candidates, please see the TOI list at the [ExoFOP site](#).

Last updated: 22 September 2025
